Toxicology 169 (2001) 241–243

TOXICOLOGY

Subject index of volume 169

α_1-acid glycoprotein; Antidote; Amitriptyline; Toxicity; Guinea-pig ventricular myocytes **169**, 133

Adjuvant effect; Monophthalate; Phthalate; Plasticizer; Immuno-suppression; Allergy **169**, 37

Allergy; Monophthalate; Phthalate; Plasticizer; Adjuvant effect; Immuno-suppression **169**, 37

Alternative method; Physicochemical method; Prediction model; Skin corrosion; Skin irritation; Eye irritation **169**, 119

Amitriptyline; α_1-acid glycoprotein; Antidote; Toxicity; Guinea-pig ventricular myocytes **169**, 133

Antidote; α_1-acid glycoprotein; Amitriptyline; Toxicity; Guinea-pig ventricular myocytes **169**, 133

Antioxidant enzymes; Lead; Developmental lead exposure; Antioxidant system **169**, 145

Antioxidant system; Lead; Developmental lead exposure; Antioxidant enzymes **169**, 145

Apoptosis; Methylmercury; Testis; Stages of seminiferous tubules; TUNEL staining; Sperm count **169**, 25

Apoptosis; *N*-methylcarbamate; Carbofuran; *N*-Nitrosocarbofuran; O^6-Methylguanine; Cell cycle arrest **169**, 153

Apoptosis; T lymphocytes; Heavy metals; Cadmium; Mercury; Lead; Vanadium; In vitro system; Proliferation; Interferon gamma **169**, 67

Benzene; Liver; Lung; CYP2E1; CYP2F2 **169**, 187

Benzo(a)pyrene; Cytochrome P450; *N*-nitrosamine; Vitamins; Garlic **169**, 83

Biological monitoring; Chlorpyrifos; Cholinesterase; Pesticide applicators; Neuropathy target esterase **169**, 177

Bladder; Thiabendazole (TBZ); Chronic toxicity; Mice; Kidney; Reproductive system **169**, 163

Blastogenesis; Triphenyltin acetate; Mouse; Thymocyte; Cytotoxicity; $CD4^+$; $CD8^+$ **169**, 227

Bronchoalveolar lavage; Chronic inflammation; Strain differences; Cyclooxygenase; Prostaglandins **169**, 1

Cadmium; T lymphocytes; Heavy metals; Mercury; Lead; Vanadium; In vitro system; Apoptosis; Proliferation; Interferon gamma **169**, 67

Carbofuran; *N*-methylcarbamate; *N*-Nitrosocarbofuran; O^6-Methylguanine; Apoptosis; Cell cycle arrest **169**, 153

Ca^{2+}; Suramin; Isolated rat liver mitochondria; Mitochondrial membrane permeability transition; Thiol oxidation **169**, 17

$CD8^+$; Triphenyltin acetate; Mouse; Thymocyte; Cytotoxicity; Blastogenesis; $CD4^+$ **169**, 227

$CD4^+$; Triphenyltin acetate; Mouse; Thymocyte; Cytotoxicity; Blastogenesis; $CD8^+$ **169**, 227

Cell cycle arrest; *N*-methylcarbamate; Carbofuran; *N*-Nitrosocarbofuran; O^6-Methylguanine; Apoptosis **169**, 153

Chlorpyrifos; Cholinesterase; Biological monitoring; Pesticide applicators; Neuropathy target esterase **169**, 177

Cholinesterase; Chlorpyrifos; Biological monitoring; Pesticide applicators; Neuropathy target esterase **169**, 177

Chronic inflammation; Strain differences; Bronchoalveolar lavage; Cyclooxygenase; Prostaglandins **169**, 1

Chronic toxicity; Thiabendazole (TBZ); Mice; Kidney; Bladder; Reproductive system **169**, 163

Chronobiology; Thermoregulation; Circadian rhythm; Neurotoxicity; Motor activity **169**, 93

Circadian rhythm; Thermoregulation; Chronobiology; Neurotoxicity; Motor activity **169**, 93

PII: S0300-483X(01)00553-4

Cyclooxygenase; Chronic inflammation; Strain differences; Bronchoalveolar lavage; Prostaglandins **169**, 1

CYP2E1; Benzene; Liver; Lung; CYP2F2 **169**, 187

CYP2F2; Benzene; Liver; Lung; CYP2E1 **169**, 187

Cytochrome P450; *N*-nitrosamine; Benzo(a)pyrene; Vitamins; Garlic **169**, 83

Cytochromes; Sytrene; Pulmonary toxicity **169**, 107

Cytotoxicity; Triphenyltin acetate; Mouse; Thymocyte; Blastogenesis; $CD4^+$; $CD8^+$ **169**, 227

Developmental lead exposure; Lead; Antioxidant system; Antioxidant enzymes **169**, 145

Endotoxin; Inflammation; Sensitivity **169**, 195

Eye irritation; Alternative method; Physicochemical method; Prediction model; Skin corrosion; Skin irritation **169**, 119

Garlic; Cytochrome P450; *N*-nitrosamine; Benzo(a)pyrene; Vitamins **169**, 83

Guinea-pig ventricular myocytes; α_1-acid glycoprotein; Antidote; Amitriptyline; Toxicity **169**, 133

Heavy metals; T lymphocytes; Cadmium; Mercury; Lead; Vanadium; In vitro system; Apoptosis; Proliferation; Interferon gamma **169**, 67

Heavy metals; T lymphocytes; In vitro system; Transcription factors **169**, 53

Immuno-suppression; Monophthalate; Phthalate; Plasticizer; Adjuvant effect; Allergy **169**, 37

Inflammation; Endotoxin; Sensitivity **169**, 195

Interferon gamma; T lymphocytes; Heavy metals; Cadmium; Mercury; Lead; Vanadium; In vitro system; Apoptosis; Proliferation **169**, 67

In vitro system; T lymphocytes; Heavy metals; Cadmium; Mercury; Lead; Vanadium; Apoptosis; Proliferation; Interferon gamma **169**, 67

In vitro system; T lymphocytes; Heavy metals; Transcription factors **169**, 53

Isolated rat liver mitochondria; Suramin; Mitochondrial membrane permeability transition; Ca^{2+}; Thiol oxidation **169**, 17

Kidney; Thiabendazole (TBZ); Chronic toxicity; Mice; Bladder; Reproductive system **169**, 163

Lead; Developmental lead exposure; Antioxidant system; Antioxidant enzymes **169**, 145

Lead; T lymphocytes; Heavy metals; Cadmium; Mercury; Vanadium; In vitro system; Apoptosis; Proliferation; Interferon gamma **169**, 67

Liver; Benzene; Lung; CYP2E1; CYP2F2 **169**, 187

Lung; Benzene; Liver; CYP2E1; CYP2F2 **169**, 187

Mercury; T lymphocytes; Heavy metals; Cadmium; Lead; Vanadium; In vitro system; Apoptosis; Proliferation; Interferon gamma **169**, 67

Methylmercury; Apoptosis; Testis; Stages of seminiferous tubules; TUNEL staining; Sperm count **169**, 25

Mice; Thiabendazole (TBZ); Chronic toxicity; Kidney; Bladder; Reproductive system **169**, 163

Mitochondrial membrane permeability transition; Suramin; Isolated rat liver mitochondria; Ca^{2+}; Thiol oxidation **169**, 17

Monophthalate; Phthalate; Plasticizer; Adjuvant effect; Immuno-suppression; Allergy **169**, 37

Motor activity; Thermoregulation; Circadian rhythm; Chronobiology; Neurotoxicity **169**, 93

Mouse; Triphenyltin acetate; Thymocyte; Cytotoxicity; Blastogenesis; $CD4^+$; $CD8^+$ **169**, 227

Neuropathy target esterase; Chlorpyrifos; Cholinesterase; Biological monitoring; Pesticide applicators **169**, 177

Neurotoxicity; Thermoregulation; Circadian rhythm; Chronobiology; Motor activity **169**, 93

***N*-methylcarbamate**; Carbofuran; *N*-Nitrosocarbofuran; O^6-Methylguanine; Apoptosis; Cell cycle arrest **169**, 153

***N*-nitrosamine**; Cytochrome P450; Benzo(a)pyrene; Vitamins; Garlic **169**, 83

***N*-Nitrosocarbofuran**; *N*-methylcarbamate; Carbofuran; O^6-Methylguanine; Apoptosis; Cell cycle arrest **169**, 153

O^6-Methylguanine; *N*-methylcarbamate; Carbofuran; *N*-Nitrosocarbofuran; Apoptosis; Cell cycle arrest **169**, 153

Pesticide applicators; Chlorpyrifos; Cholinesterase; Biological monitoring; Neuropathy target esterase **169**, 177

Phthalate; Monophthalate; Plasticizer; Adjuvant effect; Immuno-suppression; Allergy **169**, 37

Physicochemical method; Alternative method; Prediction model; Skin corrosion; Skin irritation; Eye irritation **169**, 119

Plasticizer; Monophthalate; Phthalate; Adjuvant effect; Immuno-suppression; Allergy **169**, 37

Prediction model; Alternative method; Physicochemical method; Skin corrosion; Skin irritation; Eye irritation **169**, 119

Primary carcinogenicity data; Trichloroethylene; Risk assessments; Regulatory toxicology **169**, 209

Proliferation; T lymphocytes; Heavy metals; Cadmium; Mercury; Lead; Vanadium; In vitro system; Apoptosis; Interferon gamma **169**, 67

Prostaglandins; Chronic inflammation; Strain differences; Bronchoalveolar lavage; Cyclooxygenase **169**, 1

Pulmonary toxicity; Cytochromes; Sytrene **169**, 107

Regulatory toxicology; Primary carcinogenicity data; Trichloroethylene; Risk assessments **169**, 209

Reproductive system; Thiabendazole (TBZ); Chronic toxicity; Mice; Kidney; Bladder **169**, 163

Risk assessments; Primary carcinogenicity data; Trichloroethylene; Regulatory toxicology **169**, 209

Sensitivity; Inflammation; Endotoxin **169**, 195

Skin corrosion; Alternative method; Physicochemical method; Prediction model; Skin irritation; Eye irritation **169**, 119

Skin irritation; Alternative method; Physicochemical method; Prediction model; Skin corrosion; Eye irritation **169**, 119

Sperm count; Apoptosis; Methylmercury; Testis; Stages of seminiferous tubules; TUNEL staining **169**, 25

Stages of seminiferous tubules; Apoptosis; Methylmercury; Testis; TUNEL staining; Sperm count **169**, 25

Strain differences; Chronic inflammation; Bronchoalveolar lavage; Cyclooxygenase; Prostaglandins **169**, 1

Suramin; Isolated rat liver mitochondria; Mitochondrial membrane permeability transition; Ca^{2+}; Thiol oxidation **169**, 17

Sytrene; Cytochromes; Pulmonary toxicity **169**, 107

Testis; Apoptosis; Methylmercury; Stages of seminiferous tubules; TUNEL staining; Sperm count **169**, 25

Thermoregulation; Circadian rhythm; Chronobiology; Neurotoxicity; Motor activity **169**, 93

Thiabendazole (TBZ); Chronic toxicity; Mice; Kidney; Bladder; Reproductive system **169**, 163

Thiol oxidation; Suramin; Isolated rat liver mitochondria; Mitochondrial membrane permeability transition; Ca^{2+} **169**, 17

Thymocyte; Triphenyltin acetate; Mouse; Cytotoxicity; Blastogenesis; $CD4^+$; $CD8^+$ **169**, 227

T lymphocytes; Heavy metals; Cadmium; Mercury; Lead; Vanadium; In vitro system; Apoptosis; Proliferation; Interferon gamma **169**, 67

T lymphocytes; Heavy metals; In vitro system; Transcription factors **169**, 53

Toxicity; α_1-acid glycoprotein; Antidote; Amitriptyline; Guinea-pig ventricular myocytes **169**, 133

Transcription factors; T lymphocytes; Heavy metals; In vitro system **169**, 53

Trichloroethylene; Primary carcinogenicity data; Risk assessments; Regulatory toxicology **169**, 209

Triphenyltin acetate; Mouse; Thymocyte; Cytotoxicity; Blastogenesis; $CD4^+$; $CD8^+$ **169**, 227

TUNEL staining; Apoptosis; Methylmercury; Testis; Stages of seminiferous tubules; Sperm count **169**, 25

Vanadium; T lymphocytes; Heavy metals; Cadmium; Mercury; Lead; In vitro system; Apoptosis; Proliferation; Interferon gamma **169**, 67

Vitamins; Cytochrome P450; *N*-nitrosamine; Benzo(a)pyrene; Garlic **169**, 83
